Winfree

-
- A simple stick figure drawing of a person in a dynamic, walking or running pose. The figure is composed of straight lines for the limbs and torso, with a large, rounded head. The pose is captured with fluid, overlapping lines, suggesting movement and a sense of rhythm. This sketch is used to introduce the concept of 'The Line' in drawing, which is the focus of the first chapter.

What is Haptics?

Definition

haptic

adjective

1. of or relating to the sense of touch, in particular relating to the perception and manipulation of objects using the senses of touch and proprioception.

origin

1. late 19th century: from Greek *haptikos* 'able to touch or grasp,' from *haptēin* 'fasten.'

Senses

Defined: (Opt)ics

plural noun

1. the scientific study of sight and the behavior of light, or the properties of transmission and deflection of other forms of radiation.

in•for•mat•ics

plural noun

1. the science of processing data for storage and retrieval;
informatics science

Wagner & Howe (2002)

Kontarinis, et al. (1995)

- ▶ Stimulation density needs to be high.
- ▶ Multimodal sensations are very hard to overlay.
- ▶ High complexity and weight diminish portability.
- ▶ Passive touch does not feel real.
- ▶ Tactile device design is difficult!

Kinesthetic Device Challenges

INF632
(EE499/EE599)

Winfree

Immersion CyberGrasp Glove

- ▶ Competing goals of high stiffness and low mass.
- ▶ Force feedback feels soft - “Nerfworld”.
- ▶ Point based interactions are overly simple.
- ▶ High quality devices are expensive.
- ▶ Limited workspace.
- ▶ Constrained to a desk!
